EXPERIENCE

Software Engineer

Dec 2025 – Present

Universidade do Porto *Contract · Hybrid · Porto, Portugal*

- Merging three Django/Wagtail products (faculty sites, university portal, central-services sites) into one codebase; an environment-based config layer in Python and Docker picks product, templates, styling and business rules at startup, so one codebase serves every university unit.
- Moving the codebase to current Django and Wagtail LTS releases one version at a time, each step gated by pinned dependencies, admin smoke tests on all three products, a test suite grown from 21 to 38 tests and a content comparison.
- Rewrote the course import from the university's information system as an async httpx client with rate limiting (~11,000 requests per run); turned courses from CMS pages into a plain model, clearing 4,074 orphaned pages.

Full Stack Developer

Jul 2023 – Dec 2025

Ad Evolutio *Part-time · Hybrid · Porto, Portugal*

- Migrated 50%+ of the client portfolio off end-of-life Django versions onto a supported LTS release, closing known vulnerabilities and cutting upgrade debt.
- Built and maintained full-stack applications with Django, Wagtail and PostgreSQL across multiple client projects, from data modelling and REST API design to responsive frontend delivery.

Lead Developer & Staff, Conference Websites

2023 – Present

DjangoCon Europe & PyCon Portugal *Open Source · Volunteer*

- Led development of the official Django-powered site for DjangoCon Europe 2025 (Dublin), after working as a developer on the 2024 (Vigo) site; 300+ attendees each.
- Built and maintained PyCon Portugal sites for 2025 (Cascais), 2024 (Braga) and 2023 (Coimbra) as part of the core organising team.

PROJECTS

AsyQuote, Construction SaaS Platform

2023–2024 · Grade 20/20

Final Year Project · Colgio Internato dos Carvalhos · github.com/GoncaloAS/AsyQuote

- Quoting SaaS in Django and Wagtail for small construction firms: quotes as a tree of chapters, services and priced lines with cost and margin per line; print-ready Excel export with live formulas.
- Async scraper (asyncio, aiohttp) for the supplier price catalogue: pages in batches of ten, retries with exponential backoff; ~40,000 products with pages and images in about 15 minutes. In 2026 added an RFC 9309 robots.txt matcher and Crawl-delay support.
- Accounts: mandatory email verification, reCAPTCHA, Argon2 hashing, Django's password validators (incl. 20,000 common passwords) and reset links that expire after 2 minutes.

BEYOND WORK

Online poker — long-term winning cash-game player: 568k hands since Jan 2025, +4.2 bb/100 overall from NL5 to NL100 (before rakeback); 11.8 bb/100 over 51k hands at NL100, the current stake. Weekly group and fortnightly 1:1 coaching with the Polarize Poker professional team; solver study in GTO Wizard.

EDUCATION

BSc Computer Science

FCUP — Universidade do Porto
Sep 2024 – Jul 2027 · Porto, Portugal

High School Diploma — IT Track

Colgio Internato dos Carvalhos
Sep 2022 – Jun 2024 · GPA 19/20

LANGUAGES

Portuguese	Native
English	C1
French	C1
Spanish	A2

TECHNICAL SKILLS

Languages

Python, JavaScript, C, C#, SQL

Frameworks

Django, Wagtail, HTMX, Bootstrap

Infrastructure

PostgreSQL, Docker, Git, Linux, CI/CD

Practices

REST APIs, asyncio, Web Scraping, Data Modelling
